Harley talks about the potential output at 135+ hp and 137 lb-ft of torque from the 4.06-inch bore x 4-5/8-inch stroke motor. Whether this particular bike gets to the max isn ' t important though what is, is that it ' s broken in and jetted properly. There will be plenty of power. This collection of essays charts the rise to prominence of the Ten Commandments in religious and artistic developments in the culture of late-medieval Western Europe (13th-15th centuries). Contributions include discussions of catechetical texts as well as literary writings.

The sixteenth century was an age of politically powerful women. Queens, acting in their own right, and female regents, acting on behalf of their male relatives, governed much of Western Europe. Yet even as women ruled - and ruled effectively - their right to do so was hotly contested. Men's voices have long dominated this debate, but the recovery of texts by women now allows their voices, long silenced, to be heard once again. *Debating Women, Politics, and Power in Early Modern Europe* is a study of texts and textual production in the construction of gender, society, and politics in the early modern period. Jansen explores the "gynococracy" debate and the larger humanist response to the challenge posed by female sovereignty.

In *The Monstrous Regiment of Women*, Sharon Jansen explores the case for and against female rule by examining the arguments made by theorists from Sir John Fortescue (1461) through Bishop Bossuet (1680) interweaving their arguments with references to the most well-known early modern queens. The 'story' of early modern European political history looks very different if, instead of focusing on kings and their sons, we see successive generations of powerful women and the shifting political alliances of the period from a very different, and revealing, perspective.

The reign of Henry VII is important but mysterious. He ended the Wars of the Roses and laid the foundations for the strong governments of Henry VIII and Elizabeth I. Yet his style of rule was unconventional and at times oppressive. At the heart of his regime stood his new men, low-born ministers with legal, financial, political, and military skills who enforced the king's will and in the process built their own careers and their families' fortunes. Some are well known, like Sir Edward Poynings, governor of Ireland, or Empson and Dudley, executed to buy popularity for the young Henry VIII. Others are less famous. Sir Robert Southwell was the king's chief auditor, Sir Andrew Windsor the keeper of the king's wardrobe, Sir Thomas Lovell, the Chancellor of the Exchequer so trusted by Henry that he was allowed to employ the former Yorkist pretender Lambert Simnel as his household falconer. Some paved the way to glory for their relatives. Sir Thomas Brandon, master of the horse, was the uncle of Henry VIII's favourite Charles Brandon, duke of Suffolk. Sir Henry Wyatt, keeper of the jewel house, was father to the poet Sir Thomas Wyatt. This volume, based on extensive archival research, presents a kaleidoscopic portrait of the new men. It analyses the offices and relationships through which they exercised power and the ways they gained their wealth and spent it to sustain their new-found status. It establishes their importance in the operation of Henry's government and, as their careers continued under his son, in the making of Tudor England.
