Thanks, Kat

This is book 2 of 5 of the "Understand Cancer" series. It is based on the best-available science. The SECONDARY causes of cancer were discussed in book one. This book continues from book one and discusses the PRIME cause of cancer as discovered by Nobel Prize Laureate Dr. Otto Warburg—considered by many as the founder of modern biochemistry. "There are prime and secondary causes of diseases. For example, the prime cause of the plague is the plague bacillus, but secondary causes of the plague are filth, rats, and the fleas that transfer the plague bacillus from rats to man. By a prime cause of a disease I mean one that is found in every case of the disease...Cancer, above all other diseases, has countless secondary causes. But, even for cancer, there is only one prime cause. Summarized in a few words, the prime cause of cancer is the replacement of the respiration of oxygen in normal body cells by a fermentation of sugar. All normal body cells meet their energy needs by respiration of oxygen, whereas cancer cells meet their energy needs in great part by fermentation. All normal body cells are thus obligate aerobes, whereas all cancer cells are partial anaerobes. From the standpoint of the physics and chemistry of life this difference between normal and cancer cells is so great that one can scarcely picture a greater difference. Oxygen gas, the donor of energy in plants and animals is dethroned in the cancer cells and replaced by an energy yielding reaction of the lowest living forms, namely, a fermentation of glucose." —Dr. Otto Warburg

An exploration of the new wave of science and how it relates to the models for health and medicine in the 21st century.

A powerful and substantiated expose of the medical politics that prevents promising alternative cancer therapies from being implemented in the United States. • Focuses on Harry Hoxsey, the subject of the author's award-winning documentary, who claimed to cure cancer using herbal remedies. • Presents scientific evidence supporting Hoxsey's cancer-fighting claims. • Published to coincide with the anticipated 2000 public release of the government-sponsored report finding "noteworthy cases of survival" among Hoxsey patients. Harry Hoxsey claimed to cure cancer using herbal remedies, and thousands of patients swore that he healed them. His Texas clinic became the world's largest privately owned cancer center with branches in seventeen states, and the value of its therapeutic treatments was upheld by two federal courts. Even his arch-nemesis, the AMA, admitted his treatment was effective against some forms of cancer. But the medical establishment refused an investigation, branding Hoxsey the worst cancer quack of the century and forcing his clinic to Tijuana, Mexico, where it continues to claim very high success rates. Modern laboratory tests have confirmed the anticancer properties of Hoxsey's herbs, and a federal government-sponsored report is now calling for a major reconsideration of the Hoxsey therapy. When Healing Becomes a Crime exposes the overall failure of the War on Cancer, while revealing how yesterday's "unorthodox" treatments are emerging as tomorrow's medicine. It probes other promising unconventional cancer treatments that have also been condemned without investigation, delving deeply into the corrosive medical politics and powerful economic forces behind this suppression. As alternative medicine finally regains its rightful place in mainstream practice, this compelling book will not only forever change the way you see medicine, but could also save your life.
