He's one of America's most capable, canny, candid, and independent financial experts. Now David M. Walker sounds a call to action. Comeback America is a tough-minded, innovative, inspiring guide to help us avoid the approaching economic abyss and put the country back on track again. As comptroller general of the United States and head of the Government Accountability Office (GAO) "the nation's top auditor" Walker warned Congress and the administration as the federal surplus became a giant deficit under George W. Bush. As president and CEO of the Peter G. Peterson Foundation, he now works full-time to raise public awareness regarding mounting debt burdens being imposed on future generations. Comeback America is his crucial manifesto, a way for President Obama to end out-of-control government spending and reform our tax, retirement, health care, defense, and other systems before it's too late. Walker believes that by 2030, absent significant reforms to current government programs and policies, federal taxes could double from current levels, meaning less money and poorer education for kids which will hurt families along with our nation's economic strength and position in the world. If our foreign creditors such as China decide to buy fewer of our Treasury bonds, interest rates will rise and cars and homes will become less affordable. But it doesn't have to be that way. Comeback America shows how we can return to our founding principles of fiscal responsibility and stewardship for future generations. The book includes bold ideas to control spending, save Social Security, dramatically alter Medicare, and simplify the tax code all taking into account the Obama Administration's current efforts, which receive never-before-published assessments both complimentary and critical. Nonpartisan, nonideological, and filled with a love of the country its esteemed author has spent his life serving, Comeback America is a book for anyone interested in America's economic future in other words, a book everyone should read.

A former head of the Government Accountability Office offers bold ideas on how to control spending, save Social Security, dramatically alter Medicare, and simplify the tax code all taking into account the Obama Administration's current efforts, which receive never-before-published assessments both complimentary and critical.

This book provides a "Wake-up Call" regarding what the international and domestic situation could look like for America in 2040 absent a change in course. It includes an overview of the significant adverse implications of COVID-19 related activities, lessons learned from past great powers, and key concepts from our nation's founding and past history. It summarizes a broad range of economic, national security and domestic tranquility threats facing America, including the new and dangerous Modern Monetary Theory. It also includes a number of sensible and publicly tested solutions spanning a broad range of policy areas that, if implemented, will create a better future in America and ensure that the U.S. is the first republic and great power to stand the test of time. It concludes with steps that individuals should take to create a better future for themselves, their family and our country.

Charles R. Morris's *The Trillion Dollar Meltdown* (2008) was the first book to warn of the impending financial crash in all its horrific scale and speed. Now, with *Comeback*, Morris reveals that the United States is on the brink of a strong recovery that could last for twenty years or more. The great economic boom times in American history have come because of fortuitous discoveries. Natural resources (coal first, then oil) fueled vast economic and industrial expansions, which in turn helped create and supply new markets. The last genuine economic game changer was the technology boom of the 1990s, which gave the U.S. a global competitive advantage for a while based on electronics and silicon. One of the first writers and analysts in the U.S. to predict that the tech boom would lead to a period of sustained economic growth was Charles Morris. In defiance of the recessionary times (in 1990), he saw the coming boom. Now, in 2013, he sees the threshold of another. This time the gift is natural gas. The amount and distribution of gas in American shale is so vast that it has the potential to transform the manufacturing economy, creating jobs across the country, and requiring a new infrastructure that will benefit the nation as a whole. Because of fracking, jobs that once would have been outsourced abroad will return home, America can become a net exporter of energy, and cheap energy will provide the opportunity for innovation and competition. In light of this new opportunity, and other complementary developments Morris explores in this book, the U.S. ought to be approaching the future with a robust self-confidence it has not experienced in a while. But we could fumble it away. The gold-rush style of shale boom companies does not make them good neighbors. A counter-reaction could put their industry, and the new era of national prosperity, at risk. We also have a political system that has the capacity to spoil the benefits of this huge boon. If the wealth locked in the continental shelf is not shared for the general economic good, but is instead exploited in short-term profiteering, then many of the opportunities that exist will be choked off by a few very rich corporations. Managing the great bonus of the vast store of cheap energy is going to become a defining political challenge in the years ahead. At the threshold of a thrilling opportunity, Morris is a brilliantly perceptive guide.

This book provides a "Wake-up Call" regarding what the international and domestic situation could look like for America in 2040 absent a change in course. It includes an overview of the significant adverse implications of COVID-19 related activities, lessons learned from past great powers, and key concepts from our nation's founding and past history. It summarizes a broad range of economic, national security and domestic tranquility threats facing America, including the new and dangerous Modern Monetary Theory. It concludes with steps that individuals should take to create a better future for themselves, their family and our country.

In *Comeback*, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. *Comeback* is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

Our nation has become one full of apologies and Politically Correct (PC) statements. It's time for the true right to make a political comeback. Former Governor Robert Ehrlich has written the roadmap *Turn This Car Around*. He urges the American public to make a real change and address (with him) the issues of union strangleholds, Obamacare, a failed stimulus package, soaring energy costs and high

unemployment, the race-card, the Living Wage war, bipartisanship and other heated topics. Ehrlich notes that our education system is not meeting the needs of our children, race relations have been derailed and the family structure is crumbling. This needs to change. There is too much at stake for the country and our culture. *Turn This Car Around* is a call to action, and a blunt collection of dispatches from America's culture wars, retold by a former state legislator, congressman, and governor who fought on the front lines. Bob Ehrlich recounts the contentious battles he waged in the widely recognized liberal state of Maryland, and provides insightful suggestions to help resolve many of the issues in America.

*A Country of Strangers* is a magnificent exploration of the psychological landscape where blacks and whites meet. To tell the story in human rather than abstract terms, the Pulitzer Prize-winning writer David K. Shipler bypasses both extremists and celebrities and takes us among ordinary Americans as they encounter one another across racial lines. We learn how blacks and whites see each other, how they interpret each other's behavior, and how certain damaging images and assumptions seep into the actions of even the most unbiased. We penetrate into dimensions of stereotyping and discrimination that are usually invisible, and discover the unseen prejudices and privileges of white Americans, and what black Americans make of them. We explore the competing impulses of integration and separation: the reference points by which the races navigate as they venture out and then withdraw; the biculturalism that many blacks perfect as they move back and forth between the white and black worlds, and the homesickness some blacks feel for the comfort of all-black separateness. There are portrayals of interracial families and their multiracial children--expert guides through the clashes created by racial blending in America. We see how whites and blacks each carry the burden of our history. Black-white stereotypes are dissected: the physical bodies that we see, the mental qualities we imagine, the moral character we attribute to others and to ourselves, the violence we fear, the power we seek or are loath to relinquish. The book makes clear that we have the ability to shape our racial landscape--to reconstruct, even if not perfectly, the texture of our relationships. There is an assessment of the complexity confronting blacks and whites alike as they struggle to recognize and define the racial motivations that may or may not be present in a thought, a word, a deed. The book does not prescribe, but it documents the silences that prevail, the listening that doesn't happen, the conversations that don't take place. It looks at relations between minorities, including blacks and Jews, and blacks and Koreans. It explores the human dimensions of affirmative action, the intricate contacts and misunderstandings across racial lines among coworkers and neighbors. It is unstinting in its criticism of our society's failure to come to grips with bigotry; but it is also, happily, crowded with black people and white people who struggle in their daily lives to do just that. A remarkable book that will stimulate each of us to reexamine and better understand our own deepest attitudes in regard to race in America.

No one understands the "Make America Great Again" effort with more insight and more experience than former Speaker of the House Newt Gingrich. Gingrich was an ally of President Ronald Reagan during his 1980 "Let's Make America Great Again" campaign. In 1994, Newt was the architect of the Contract with America and the campaign that ended 40 years of Democratic control in the House of Representatives. As a friend and supporter of President Donald Trump, Gingrich authored the #1 New York Times bestseller *Understanding Trump*, which explained the 2016 election and the early Trump presidency in ways no one else could. In *Trump's America: The Truth About Our Nation's Great Comeback*, Gingrich describes our country's tremendous turnaround under President Donald Trump's leadership - and confronts the desperate efforts by the elites in academia, the media, and the Washington establishment to undermine and distort his achievements. The Americans who elected President Trump expect him to make good on his iconic call to "Make America Great Again." So far, he is making good on his promise. The swamp is being drained, the judiciary is being restored, the economy is growing rapidly, unemployment is in decline, and America's strength and standing as the world's dominant super power is improving daily. Meanwhile, Trump's opponents in Washington and the media are lashing out because they can't stand the fact that the President they deeply oppose is succeeding. Gingrich

understands the challenges faced by the White House staff, the role fake news plays in modern politics, and the ropes of legislative infighting in Congress. Trump's America tells the truth that the elites in the media and Washington don't want you to know.

Asserts that America is straying from its democratic ideals and faltering in a rapidly globalized world community, and challenges policies that are based on a priority of making America "number one" in the world while examining the economic and political forces that have brought about contemporary problems.
