Health geography makes critical contributions to contemporary and emerging interdisciplinary agendas of nature-based health and health-enabling places. Couched in theory and critical empirical work on nature and health, this book addresses questions on the relationships between water, health and wellbeing. Water and blue space is a key focus in current health geography research and a new hydrophilic turn has emerged with a particular focus on the aspects of water which are affective, life-enhancing and health-enabling. Research considers the benefits and risks associated with blue space, from access to safe and clean water in the Global South, to health promoting spaces found around urban waters, to the deeper implications of climate change for water-based livelihoods and indigenous cultures. This book reflects recent theoretical debates within health geography, drawing from research in the public health, anthropology and psychology sectors. Broad thematic sections focus on interdisciplinary, experiential and equity-based elements of blue space, with individual chapters that consider indigenous and global health, water 's healing properties, leisure and blue yoga culture, coastal landscapes, surfing, swimming and sailing, along with more contested hydrophobic dimensions. The interdisciplinary lens means this book will be extremely valuable to human geographers and cultural geographers. It will also appeal to practitioners and researchers interested in environmental health, leisure and tourism, health inequalities and public health more broadly.

This is the second edition of Robert Pratten's massively popular Getting Started in Transmedia Storytelling. NEW YORK TIMES BESTSELLER USA TODAY BESTSELLER Amazon, Apple, Facebook, and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about everyone is wrong. For all that 's been written about the Four over the last two decades, no one has captured their power and staggering success as insightfully as Scott Galloway. Instead of buying the myths these companies broadcast, Galloway asks fundamental questions. How did the Four infiltrate our lives so completely that they 're almost impossible to avoid (or boycott)? Why does the stock market forgive them for sins that would destroy other firms? And as they race to become the world 's first trillion-dollar company, can anyone challenge them? In the same irreverent style that has made him one of the world 's most celebrated business professors, Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers. He shows how they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves, at a speed and scope others can 't match. And he reveals how you can apply the lessons of their ascent to your own business or career. Whether you want to compete with them, do business with them, or simply live in the world they dominate, you need to understand the Four.

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. This begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.
