**4 Tips for Turbocharged Diesel Engine Maintenance - Gold Eagle**  
Diesel is high in sulfur, and as we all know, sulfur smells terrible. The oil filter system is very important on a diesel engine, because of the sulfur residue and carbon which are created when fuel does not burn completely. A good filter will ensure that all corrosive particles are removed from the oil. Failure to change the oil routinely in a gasoline vehicle will cause the engine to age prematurely.

**Essential Diesel Engine Maintenance Tips**  
Diesel engine 2nd-class maintenance refers to the cumulative work 500h or regular maintenance every six months. The maintenance parts include injector, fuel injection pump, water pump, valve, radiator and fuel injection plug, etc.

**Maintenance Tips for Diesel Engine**  
Plugs. Gasoline powered engines have spark plugs and those plugs will, on average, need to be changed every 30,000 to 100,000 miles depending on whether the car has copper, iridium or platinum plugs. Diesel engines don ' t have spark plugs, which means there is no plug maintenance necessary.

**Maintenance on Diesel Engines Vs Gas | Mechanics Hub**  
We suggest you carry the following: extra oil, coolant, washer fluid, and DEF fluid, a fuel filter, and a fuel filter wrench. But take note that when changing your fuel filters, you must install the new fuel filters full of diesel fuel. In addition, as a professional driver you need to keep a lookout for engine overheating, oil leaks, and coolant leaks, and keep up with general preventive maintenance.

**6 Important Maintenance Tips For Diesel Engines - Wyoming ...**  
However, like gasoline-powered engines, diesel engines need regular maintenance. The following is a list of the top seven most important diesel pickup engine maintenance tips. 1.Get regular oil/oil filter changes. In a gasoline powered vehicle, being indolent with oil and oil filter changes will prematurely age the engine.
