With the increasing popularity of GM's LS-series engine family, many enthusiasts are ready to rebuild. The first of its kind, How to Rebuild GM LS-Series Engines, tells you exactly how to do that. The book explains variations between the various LS-series engines and elaborates up on the features that make this engine family such an excellent design. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendicies are packed full of valuable reference information, and the book includes a Work-Along Sheet to help you record vital statistics and measurements along the way.

Sometimes, a leap of faith requires three revolutions and a perfect landing. When seventeen-year-old, Shay Gerrard becomes the newest US ladies' figure-skating champion, she is one step closer to realizing her dream of winning Olympic gold. Everything goes as planned until a representative of the State Department arrives at Shay's home with stunning news: Shay's estranged father has been arrested in Beijing for attending an illegal house church. Shay insists it must be a mistake. Her father was an avowed atheist. What would he be doing at a house church in China? When the news breaks that a US Olympian's father has been imprisoned for his religious beliefs in the host city of the Olympics, Shay is swept up in a political and media firestorm that will follow her to Beijing and threaten her Olympic dream. Shay has never been a believer, but before the Games are over, Shay Gerrard will stun the world and discover that God often uses the unlikeliest people for his greatest good.

This report begins by providing some background information on the Canadian fluid milk industry, including production, employment, & value produced. The report then describes the method used to develop & apply energy efficiency & cost-related benchmarks to this sector. These benchmarks are established at the plant level and by stage of production. Principal findings are reported, starting with an outline of the benchmark targets. Results for 17 participating fluid milk plants representing over 50% of Canadian output are analyzed at the plant level, and data from these participants are analyzed by eight categories (five stages of production and three plant services) at the sub-plant level. Total incentives for achieving the benchmark targets on efficiency & unit costs are then estimated. The final chapter summarizes potential energy-saving ideas identified in recent analyses of the fluid milk sector.
