850 Turbo: 156-185psi.

These ranges are generally applicable to all turbo and non-turbo 5-cylinder Volvos. The concept still applies - a non-turbo engine will have a higher compression ratio, while a turbo engine has less.

## PERFORMANCE TUNING B 18 SERIES VOLVOS

Volvo specifies a compression ratio of between 11-13 BAR (roughly 160-190 psi). A good rule of thumb is that each cylinder should read a minimum of 85% of value of the highest cylinder. So, if the highest reading is 180 psi, then the
