320 Words Essay on Search Engines

- shareyouressays. com

The work of search engines is based on a similar principle. In fact, when a user enters a search keyword, he refers to the Internet index, a list of all Internet keywords, specifying the pages where they

can be met. A search engine is a program that compiles and stores of the Internet index and it also finds the specified keywords in it.

How does a search engine work? | 10PagePapers.com Disadvantages of

search engines.
Introduction.
Search engines
Most of the people
are now using the
internet to get
information that
they require. In
their endeavors of
trying to locate this
information, they
will use the search
engines or the
subject directories.

Here, the disadvantages of using the search engine will be examined.

Disadvantages of search engines Free Essay Example
A search engine is a software system which merges almost every

aspect of advanced technology, such as analysis of user behavior, natural language processing, data mining, information retrieval, and robot learning. The search engine would provide query services for the users after it crawls, indexes and

ranks the
webpages (Shuling,
2011).
