The Handbook of World Englishes is a collection of newly commissioned articles focusing on selected critical dimensions and case studies of the theoretical, ideological, applied and pedagogical issues related to English as it is spoken around the world. Represents the cross-cultural and international contextualization of the English language Articulates the visions of scholars from major varieties of world Englishes – African, Asian, European, and North and South American Discusses topics including the sociolinguistic contexts of varieties of English in the inner, outer, and expanding circles of its users; the ranges of functional domains in which these varieties are used; the place of English in language policies and language planning; and debates about English as a cause of language death, murder and suicide.

Provides a clear introduction to the key terms and frameworks in cognitive poetics and stylistics

"A popular guide for teachers, providing a comprehensive and useful introduction to the principles and practice of teaching English as a foreign/second language"--

... there are many first-rate contributions here. Those contributions make this collection valuable especially to readers who are already knowledgeable about the various areas in which the interests of philosophers and economists overlap. Daniel M. Hausman, Journal of Economic Methodology The Elgar Companion To Economics and Philosophy is a very good read. Every library should buy it now. John King, History of Economics Review The volume collects articles surveying developments in such related fields as economic methodology, ethics, epistemology, and social ontology. Many of the articles are forward-looking, and as such constitute substantive and original (and at times provocative) contributions to the literature. The volume as a whole is a success; the editors are to be congratulated for their efforts. Bruce J. Caldwell, University of North Carolina, Greensboro, US This Companion is called economics and philosophy but actually it is about the philosophy of economics and all the great questions in the subject are here. The weather in the philosophy of economics has been stormy lately and the climate continues to this day to be unsettled. Will the storms soon settle down to give way to calmer days? Read this excellent collection of informative papers in the field to stimulate your own answer to that question. Mark Blaug, University of London and University of Buckingham, UK The Elgar Companion to Economics and Philosophy aims to demonstrate exactly how these two important areas have always been linked, and to illustrate the key areas of overlap. The Companion is divided into distinct parts, each of which highlights a leading area of scholarly concern: political economy conceived as social philosophy; the methodology and epistemology of economics; and social ontology and the ontology of economics. The contributors are well-known and distinguished authors from a variety of disciplines, who have been invited both to survey and to provide a personal assessment of current and prospective future states of their respective areas of philosophical interest. Academics and students who have an interest in economics and philosophy, political philosophy and the history of ideas will find this book of great appeal, as will researchers working in the field and readers interested in the nature of the discipline of economics.

Presents entries A to L of a two-volume encyclopedia discussing religion around the globe, including biographies, concepts and theories, places, social issues, movements, texts, and traditions.

While local conditions remain at the forefront of writing program administration, transnational activities are slowly and thoroughly shifting the questions we ask about writing curricula, the space and place in which writing happens, and the cultural and linguistic issues at the heart of the relationships forged in literacy work. Transnational Writing Program Administration challenges taken-for-granted assumptions regarding program identity, curriculum and pedagogical effectiveness, logistics and quality assurance, faculty and student demographics, innovative partnerships and research, and the infrastructure needed to support writing instruction in higher education. Well-known scholars and new voices in the field extend the theoretical underpinnings of writing program administration to consider programs, activities, and institutions involving students and faculty from two or more countries working together and highlight the situated practices of such efforts. The collection brings translingual graduate students at the forefront of writing studies together with established administrators, teachers, and researchers and intends to enrich the efforts of WPAs by examining the practices and theories that impact our ability to conceive of writing program administration as transnational. This collection will enable writing program administrators to take the emerging locations of writing instruction seriously, to address the role of language difference in writing, and to engage critically with the key notions and approaches to writing program administration that reveal its transnationality.

Since the dawn of science, ideas about the relation between science and religion have always depended on what else is going on in a society. During the twentieth century, daily life changed dramatically. Technology revolutionized transportation, agriculture, communications, and housework. People came to rely on scientific predictability in their technology. Many wondered whether God's supposed actions were consistent with scientific knowledge. The twenty-first century is bringing new scientific research capabilities. They are revealing that scientific results are not totally predictable after all. Certain types of interaction lead to outcomes that are unpredictable, in principle. These in turn may lead to a whole new range of potential interactions. They do not rule out the reality of a dynamic God who can act in the world without breaking the known principles of science. God may in fact work with "the way things really are." Human experience of God may accurately reflect this reality. Interactive World, Interactive God illustrates such new understandings in religion and science by describing recent developments in a wide range of sciences, and providing theological commentary. The book is written for intelligent readers who may not be specialized in science but who are looking for ways to understand divine action in today's world.

Situated at the intersection of two of the most important areas in educational research today — literacy and technology — this handbook draws on the potential of each while carving out important new territory. It provides leadership for this newly emerging field, directing scholars to the major issues, theoretical perspectives, and interdisciplinary research pertaining to new literacies. Reviews of research are organized into six sections: Methodologies Knowledge and Inquiry Communication Popular Culture, Community, and Citizenship: Everyday Literacies Instructional Practices and Assessment Multiple Perspectives on New Literacies Research FEATURES Brings together a diverse international team of editors and chapter authors Provides an extensive collection of research reviews in a critical area of educational research Makes visible the multiple perspectives and theoretical frames that currently drive work in new literacies Establishes important space for the emerging field of new literacies research Includes a unique Commentary section: The final section of the Handbook reprints five central research studies. Each is reviewed by two prominent researchers from their individual, and different, theoretical position. This provides the field with a sense of how diverse lenses can be brought to bear on research as well as the benefits that accrue from doing so. It also provides models of critical review for new scholars and demonstrates how one might bring multiple perspectives to the study of an area as complex as new literacies research. The Handbook of Research on New Literacies is intended for the literacy research community, broadly conceived, including scholars and students from the traditional reading and writing research communities in education and educational psychology as well as those from information science, cognitive science, psychology, sociolinguistics, computer mediated communication, and other related areas that find literacy to be an important area of investigation.

Over the past few decades there have been intense debates in education surrounding children ' s literacy achievement and ways to promote reading, particularly that of boys. The Harry Potter book series has been received enthusiastically by very many children, boys and girls alike, but has also been constructed in popular and media discourses as a children ' s, particularly a boys ' , literacy saviour. Children ' s Literacy Practices and Preferences: Harry Potter and Beyond provides empirical evidence of young people ' s reported literacy practices and views on reading, and of how they see how the Harry Potter series as having impacted their own literacy. The volume explores and debunks some of the myths surrounding Harry Potter and literacy, and contextualizes these within children ' s wider reading.

The Routledge Companion to Cinema and Politics brings together forty essays by leading film scholars and filmmakers in order to discuss the complex relationship between cinema and politics. Organised into eight sections - Approaches to Film and Politics; Film, Activism and Opposition; Film, Propaganda, Ideology and the State; The Politics of Mobility; Political Hollywood; Alternative and Independent Film and Politics; The Politics of Cine-geographies and The Politics of Documentary - this collection covers a broad range of topics, including: third cinema, cinema after 9/11, eco-activism, human rights, independent Chinese documentary, film festivals, manifestoes, film policies, film as a response to the post-2008 financial crisis, Soviet propaganda, the impact of neoliberalism on cinema, and many others. It foregrounds the key debates, concepts, approaches and case studies that critique and explain the complex relationship between politics and cinema, discussing films from around the world and including examples from film history as well as contemporary cinema. It also explores the wider relationship between politics and entertainment, examines cinema ' s response to political and social transformations and questions the extent to which filmmaking, itself, is a political act.
