## Workvisual

The KUKA WorkVisual program code is already checked for logic in the background while programming steps are being carried out. This means that errors are nipped in the bud, and projects can be implemented more efficiently and consistently.

Interactions are made visible by visual tools –

## Workvisual

### *Robots - CNC Manual*

WorkVisual is the configuration tool for KUKA robots, it is not the simulation environment (that would be KUKA SimPro, KUKA|prc of course also simulates robots). So it will be important for you during setup, but probably not really something you will need on a daily basis.
